High Performance Energy Efficient Standard and Softcoat LowE IGU for Aluplast uPVC systems

Australian Glass Group®

agg.com.au | info@agg.com.au | 1300 768 024

Australian Glass Group is proud to showcase our High Performance Softcoat LowE IGU offerings in WERS linked to Aluplast uPVC suites.

Proudly manufactured, certified, stocked and guaranteed in Australia – NSW, VIC and TAS.

Also known as Sputter Coated LowE, this evolution of technology and innovation sees atomic layers of silver and metal oxides provide superior performance as well as no risk of visible haze that other hardcoat LowE coatings can have.

LowE is low emissivity, meaning low heat transfer through the glass. AGG offers a full range to meet all your performance needs. Partnered with the superior insulation of a Double Glazed Unit (DGU), you will find some of the best performances available:

Insulglass Classic® – Our classic Insulated Glass Units (IGU), no coating but argon gas as standard

Insulglass LowE Prime® – An ideal LowE for warmer climates to minimise Glare and a balance of Solar Control & great Insulation

Insulglass LowE Plus® – An ideal LowE for colder climates with maximum Visible Light, Passive Heat Gain & excellent Insulation

Insulglass LowE Max® – Superior performance to maximise both Solar Control and Insulation without compromising Visible Light

AGG also understands the vital importance of certification and compliance of glass products. Our products are manufactured and certified to Australian Standards by an international certification body, Bureau Veritas. Relevant compliance is certified and available on request in key areas including;

AS/NZS 2208:1996 – Safety glazing materials in buildings

AS/NZS 4666: 2012 – Insulated Glass Units

Australian Glass Group provides this document based on accurate information from published WERS performance data at the time of the booklets creation. Data may change over time and updated versions may exist. It is the readers responsibility to confirm accuracy by either clicking into the dynamic links contained within the booklet and compare with live WERS data and/or check directly on www.awawers.net and/or www.agg.com.au for the most current booklet version.
